

About Garment Industry of Bangladesh

The industry that has been making crucial contribution to rebuilding the country and its economy is none other than the readymade garment (RMG) industry which is now the single biggest export earner for Bangladesh. The sector accounts for 83% of total export earnings of the country. The "Made in Bangladesh" tag has also brought glory for the country, making it a prestigious brand across the globe. Bangladesh, which was once termed by cynics a "bottomless basket" has now become a "basket full of wonders." The country with its limited resources has been maintaining 6% annual average GDP growth rate and has brought about remarkable social and human development. In 2021/22 RMG export of Bangladesh was over \$42 billion and 2nd in the world. Since last 7~8 years, this industry has gained high appreciation for tremendous improvement on working condition and positive focus on sustainability. It has also shown great resilience during Covid-19 pandemic period. The country aims to achieve sustainable RMG exports growth in next decade too.
